Saint Martin's Rock

Mountain · Vosges

GPS coordinates	48.27807, 6.93217
Elevation	575 m
Maximum height	50 m max
Access	On foot < 1,000 m
Nearest aerodrome	Aérodrome de Saint-Dié - Remomeix (LFGY) 5.8 km E · spot 214 m higher
Spot reference	298298

Aérodrome de Saint-Dié - Remomeix	Aerodrome	5.8 km E	361 m

Description

Magnificent view of saint dié and surroundings (you have both sides of the valley); the rock saint martin is very pretty in aerial view. The site is frequented during the summer period, it will be necessary to be patient to fly over the area without risk, especially since there are often paragliders and the site is also close to the Remomeix airfield. You can launch the drone at the top of the rock or at the foot of the rock (it's a bit sporty but it's done); the site is surrounded by tall trees. Altitude: 550m

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
