FLIGHT CARD

Generated on 21 November 2026

Chartreuse / Pas du Frou

Mountain · Savoie

GPS coordinates	45.42708, 5.80257
Elevation	605 m
Maximum height	120 m max
Access	On foot > 1,000 m
Nearest aerodrome	St Jean D'avelanne Airfield (LFKH) 14 km NW · spot 311 m higher
Spot reference	296310

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:11	07:44	17:02	17:34	9 h 17	07:44–08:30 · 16:15–17:02
Sun 22 Nov	07:12	07:45	17:01	17:33	9 h 15	07:45–08:31 · 16:14–17:01
Mon 23 Nov	07:14	07:46	17:00	17:33	9 h 13	07:46–08:33 · 16:13–17:00

Nearby aerodromes

Aerodrome	Type	Distance	Elevation
St Jean D'avelanne Airfield	Aerodrome	14 km NW	294 m
Centre Hospitalier Heliport	Heliport	18 km NE	319 m
Aérodrome de Chambéry Challes-les-Eaux	Aerodrome	20 km NE	297 m
Aérodrome de Grenoble Le Versoud	Aerodrome	23 km S	220 m

Description

I present you my method to hike with a Phantom 3 or 4 drone using a standard backpack, during a walk on the edge of the vertiginous cliffs of Frou located in the Chartreuse massif. A small backpack with a ski carrier is ideal, it allows you to carry the Phantom without disassembling the propellers and to bring the radio, extra batteries, water, a jacket and a small snack. Shooting and editing by Paladrone https://www.facebook.com/paladrones Civilian UAV pilot with DGAC registration S1/S3.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
