FLIGHT CARD

Generated on 24 November 2026

Mont Zeus - Mount Zas - Za - 1004m

Mountain · Greece

GPS coordinates	37.03098, 25.50172
Elevation	912 m
Maximum height	120 m max
Access	On foot > 1,000 m
Nearest aerodrome	Naxos Apollon Airport (LGNX) 13 km NW · spot 909 m higher
Spot reference	301314

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+02:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Tue 24 Nov	06:38	07:06	17:04	17:32	9 h 57	07:06–07:45 · 16:24–17:04

Naxos Apollon Airport	Aerodrome	13 km NW	3 m
Koufonisi Heliport	Heliport	14 km SE	22 m
Schinousa Heliport	Heliport	18 km S	96 m
Iraklia Heliport	Heliport	19 km S	58 m

Description

The Roof of the Cyclades, the highest mountain in the Cyclades. The location is beautiful and gives a 360 degree panoramic view of the whole island of Naxos and the surrounding islands. The ground is totally clear for the UAV, takeoff is simple, the wind can blow strong. There are plenty of camera games to be done in front of the cliff which falls steeply for several hundred meters. The path leading to the summit is dotted with magnificent scenery, low walls and stone goat parks. There are no houses in this area. The ascent is a bit physical and takes 2 hours maximum on foot but it's really worth it.

Scan to open the up-to-date spot page: weather, map and restrictions.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

This country applies the European drone rules (open category); it may add its own zones and conditions.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
