Description

The pointe de Grave (in Occitan: punta de Grava) is a cape marking the northern end of the Médoc and the Gironde department. It is also the northern limit of the Landes de Gascogne, Gascony, the Landes forest and the Côte d'Argent. Administratively dependent on the commune of Verdon-sur-Mer, this natural lock facing Royan and the Arvert peninsula is one of the "gates" of the Gironde estuary, which bathes its eastern coast, while its western shore is bordered by the Atlantic Ocean. The site, which is part of the Médoc Regional Natural Park and the Marine Natural Park of the Gironde Estuary and the Pertuis Sea, includes preserved natural areas (dune barrier, Pointe de Grave national forest, Logis marshes), monuments (Grave lighthouse, Saint-Nicolas lighthouse, Cordouan lighthouse, offshore), various memorials (monument to the Americans, to the members of Operation Frankton) and tourist …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
