Lac de Guerlédan - Drainage

Water · Côtes-d'Armor

GPS coordinates	48.20727, -3.06103
Elevation	139 m
Maximum height	120 m max
Access	On foot > 1,000 m
Nearest aerodrome	Pontivy Airport (LFED) 20 km SE · spot 15 m higher
Spot reference	296786

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Description

A glimpse of what awaits you this summer 2015 when you visit Lake Guerlédan after its emptying. Since the beginning of May the mud is starting to turn green and soon the bottom will be covered with vegetation. Emptying of the lake of Guerlédan filmed with our drone DJI Inspire 1 in double order. Rushs 4k of the assec available for sale. Images not free of rights. All rights reserved For any use, please contact us: http://www.nicolascharles.fr/vente-videos-drone-vidange-lac-de-guerledan-2015/

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
