FLIGHT CARD

Generated on 21 November 2026

Puivert Castle

Heritage · Aude

GPS coordinates	42.92130, 2.05730
Elevation	603 m
Maximum height	50 m max
Access	On foot < 1,000 m
Nearest aerodrome	Puivert Airfield (LFNW) 1.1 km S · spot 113 m higher
Spot reference	296987

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:21	07:51	17:24	17:55	9 h 32	07:51–08:35 · 16:40–17:24
Sun 22 Nov	07:22	07:53	17:23	17:54	9 h 30	07:53–08:36 · 16:39–17:23
Mon 23 Nov	07:23	07:54	17:23	17:54	9 h 28	07:54–08:38 · 16:39–17:23

Base ULM de Régat	Aerodrome	15 km NW	409 m
Troye d'Ariège ULM	Aerodrome	18 km NW	420 m
Ulmodrome de Limoux	Aerodrome	20 km NE	183 m

Description

Puivert Castle Puivert (11) The construction dates back to the 12th century. The first mention of the building dates back to 1152 and belonged to the de Congost family at the time of the Albigensian crusade. These powerful lords of Quercorb, regularly welcomed the "greats", including Eleanor of Aquitaine, for sumptuous feasts; they practised catharism and were shown as heretics. Thus, in November 1210, the castle suffered a three-day siege by the army of Thomas Pons de Bruyère, Simon de Montfort's lieutenant, and Puivert became a possession of the kingdom.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
