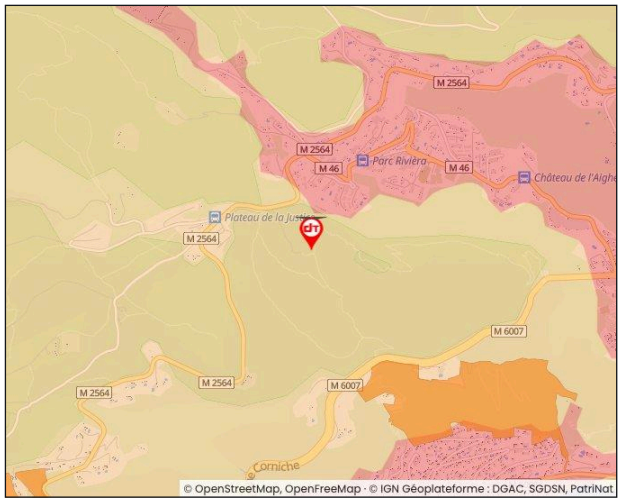
Mont Bastide - 570 Meters

Mountain · Alpes-Maritimes

GPS coordinates	43.73066, 7.34687
Elevation	516 m
Maximum height	50 m max
Access	On foot < 1,000 m
Nearest aerodrome	Princess Grace Hospital Helipad 5.1 km E · spot 413 m higher
Spot reference	308248



Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Wed 25 Nov	07:06	07:37	16:58	17:29	9 h 20	07:37–08:22 · 16:13–16:58

Description

Mont Bastide - 570 Meters, Èze - Côte d'Azur - Drone 4K/UHD - December 2021 Like the rest of the Alpes-Maritimes coastline, the territory of the commune of Èze has been occupied since ancient times. The most remarkable monument is the one on Mont-Bastide, which overlooks Beaulieu-sur-Mer and the bay of Saint-Jean, on a rocky spur bordering the Grande Corniche. Local tradition, based on the speculations of scholars of the 19th and early 20th centuries, made it a Phoenician foundation, a Mycenaean palace or a Ligurian oppidum dating back to the early Iron Age. Recent research has uncovered a large farming town protected by a solid wall. The urban layout is very tight. Large dry-stone houses with an upper floor are arranged around a main street that runs right through the village. The ground floor of each house holds pressing facilities used for making wine or oil. The oldest traces of …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
