Aerodrome	Type	Distance	Elevation
Casa del Mare Helipad	Heliport	6.2 km S	5 m
Avenue Impératrice Eugénie Heliport	Heliport	6.8 km S	36 m
Avenue Douine Heliport	Heliport	7.5 km S	44 m
Terre-Plein du Larvotto Heliport	Heliport	7.9 km S	6 m

Description

Very nice hike of about 10km, for a positive difference in altitude of 330M. Departure from the Col des Banquettes B471 and take the road towards the point, about 1.5km before arriving at the Col de Verroux B446 which reveals a magnificent Roman road. From the Col continue to climb up to the point, which will offer you a magnificent 360° panorama. To start again we will take the track that goes around the valley passing by B446, B469, B472. From the B472, it goes straight down, until you reach a blokhaus plateau which offers a nice view before you find your car a little further down.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
