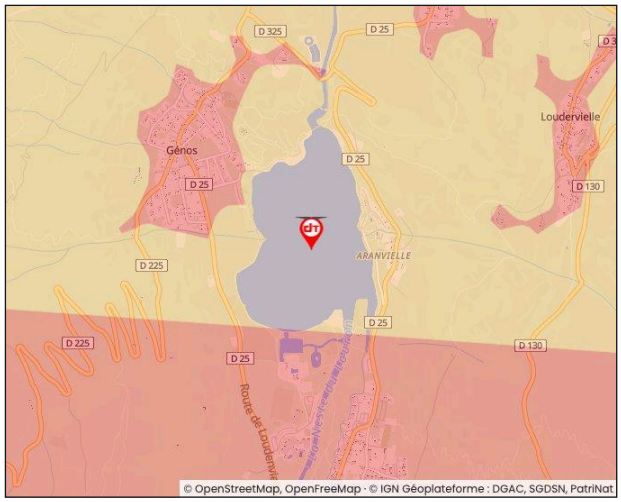
FLIGHT CARD

Generated on 24 November 2026

Lac de Génos-Loudenvielle

Water · Hautes-Pyrénées

GPS coordinates	42.80551, 0.40811
Elevation	950 m
Maximum height	50 m max
Access	Direct access by car
Nearest aerodrome	Altiport de Peyresourde Balestas (LFIP) 2.4 km SE · spot 632 m lower
Spot reference	312475



Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Tue 24 Nov	07:30	08:01	17:29	18:00	9 h 27	08:01–08:45 · 16:45–17:29
Wed 25 Nov	07:31	08:02	17:28	17:59	9 h 25	08:02–08:46 · 16:44–17:28
Thu 26 Nov	07:32	08:04	17:28	17:59	9 h 24	08:04–08:48 · 16:44–17:28

Nearby aerodromes

Aerodrome	Type	Distance	Elevation
Altiport de Peyresourde Balestas	Aerodrome	2.4 km SE	1,582 m
Pene De Soulit Altisurface	Aerodrome	4.6 km E	1,940 m
Altisurface de Honteyde	Aerodrome	8.4 km NE	1,900 m
Altisurface de Cap De Barres	Aerodrome	11 km NE	1,767 m

Description

Magnificent lake in the middle of the Pyrenees... simply magical in sunny weather!!! Easy access by car, with everything you need to spend an afternoon with the family. Max flight height 50 meters. Be careful though, you can't fly everywhere around the lake. Pleasant flight in a dream setting!

Scan to open the up-to-date spot page: weather, map and restrictions.

https://www.drone-spot.tech/en/fiche-spot.aspx?id=312475

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
