Mauzun Castle

Heritage · Puy-de-Dôme

GPS coordinates	45.70467, 3.42840
Elevation	636 m
Maximum height	120 m max
Access	On foot < 1,000 m
Nearest aerodrome	Clermont-Ferrand Auvergne Airport (LFLC) 22 km NW · spot 304 m higher
Spot reference	297102

Aérodrome d'Issoire-Le Broc	Aerodrome	25 km SW	378 m

Description

Small aerial visit of the castle of Mauzun located in the Puy-de-Dôme. A ghost town perched in a mountain amphitheatre, Mauzun Castle stands with its striking silhouette of gigantic ruins on the steps of the Livradois. Visible from afar, the fortress crowns the mound of an old volcano of Auvergne from which it draws its black stone. The castle, at the heart of the defensive system, is protected below by two successive enclosures. The castral complex, with 20 towers and 1600 m of curtain walls, covers an area of 5 hectares. Shots taken with a DJI Mavic Air and a racer drone, despite the wind.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
