Generated on 21 November 2026

Saint Ulrich Castle

Heritage · Haut-Rhin

GPS coordinates	48.20285, 7.30526
Elevation	522 m
Maximum height	50 m max
Access	On foot < 1,000 m
Nearest aerodrome	Colmar-Houssen Airport (LFGA) 11 km S · spot 331 m higher
Spot reference	297306

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:12	07:47	16:47	17:21	9 h 00	07:47–08:37 · 15:57–16:47

Hôpital Pasteur Heliport	Heliport	14 km S	201 m
Aérodrome d'Albé - Val de Villé	Aerodrome	16 km N	380 m
Envol ULM Alsace	Aerodrome	18 km E	176 m

Description

Flight over the Castle of Saint Ulrich located in the village of Ribeauvillé. The latter is part of a group of three castles visible near this commune. In spite of the abandonment of this castle, it is well preserved and it is even possible to climb one of the towers, but also to visit the premises. Beautiful panorama with the Girsberg castle in the background. Be careful, rather busy site.

Scan to open the up-to-date spot page: weather, map and restrictions.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
