The Montpeloux Volcano - Salient

Mountain · Puy-de-Dôme

GPS coordinates	45.47219, 3.91233
Elevation	996 m
Maximum height	120 m max
Access	Direct access by car
Nearest aerodrome	Ambert Le Poyet Airport (LFHT) 14 km W · spot 433 m higher
Spot reference	297425

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:19	07:51	17:09	17:42	9 h 17	07:51–08:38 · 16:23–17:09
Sun 22 Nov	07:20	07:53	17:08	17:41	9 h 15	07:53–08:39 · 16:22–17:08
Mon 23 Nov	07:21	07:54	17:07	17:40	9 h 13	07:54–08:41 · 16:21–17:07

Aerodrome	Type	Distance	Elevation
Ambert Le Poyet Airport	Aerodrome	14 km W	563 m
Base ULM du Forez	Aerodrome	22 km NE	385 m

Description

Montpeloux is one of the rare examples of volcanic relief in the Monts du Forez. Long after having served as a promontory for a powerful castle, Montpeloux was gradually nibbled away by the work of a basalt quarry, which today allows us to penetrate the belly of the volcano. Beautiful basalt prism cliffs and life-size geological sections have been uncovered, which fascinate geologists.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
