## Nearby aerodromes

| Aerodrome | Type | Distance | Elevation |
|---|---|---|---|
| Centre Hospitalier Heliport | Heliport | 12 km W | 89 m |
| Romorantin Pruniers Airfield | Aerodrome | 15 km W | 88 m |
| Vierzon Méreau Airfield | Aerodrome | 20 km SE | 131 m |

## Description

A bit peculiar but it's a gite and the boss lets the dronists fly in his forests and meadows. I flew with a Mavic and with my 5/6" freestyle drones there, the spot is beautiful and varied. On the other hand it is only accessible to the clients of the gite, but it is still a good plan. The meadow is perfect for freestyle or racing, the more adventurous / experienced can go to the rest of the 57 hectares territory, but personally I preferred to do it in Mavic, just to not get stuck in one of the ponds, like a friend who left a babyhawk there. The natural and artificial elements (powerloop the FFS tractor garage!) make it a very varied spot, lost away from everyone, where no one is disturbed.

**Scan to open the up-to-date spot page: weather, map and restrictions.**

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

# Preparing the flight

## Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

## Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

*Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.*
