Base ULM de Taillefontaine	Aerodrome	15 km E	145 m
Le Plessis-Belleville Airfield	Aerodrome	24 km S	118 m

Description

Superb drone spot, and ground shooting. Archaeological and historical site of our Country, open all year round to the public. A place where locals meet to picnic and spend a day with the family in a magical place. PS: Another place to visit next door, at the entrance of the village, is a superb ruined church on the right after the entrance sign of the village of CHAMPLIEU, just before arriving at the site of the Gallo-Roman ruins of CHAMPLIEU. Height of restriction of leisure UAV flight: 150m WARNING : - Site where many small tourist planes fly at 150m or less for some. So be very careful when you hear an aircraft engine noise nearby, and don't hesitate to lower your drone to 30m for safety (that's what I did when I was there). - If you go there on the Week-End, it is possible that there will be people there, so wait for a period when there are less people over the areas to fly over for …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
