FLIGHT CARD

Generated on 21 November 2026

the double chartreuse arch

Mountain · Isère

GPS coordinates	45.37319, 5.90764
Elevation	1,530 m
Maximum height	120 m max
Access	On foot < 1,000 m
Nearest aerodrome	Aérodrome de Grenoble Le Versoud (LFLG) 18 km S · spot 1,310 m higher
Spot reference	298878

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:11	07:43	17:01	17:34	9 h 18	07:43–08:29 · 16:15–17:01
Sun 22 Nov	07:12	07:44	17:01	17:33	9 h 16	07:44–08:31 · 16:14–17:01
Mon 23 Nov	07:13	07:46	17:00	17:32	9 h 14	07:46–08:32 · 16:13–17:00

Nearby aerodromes

Aerodrome	Type	Distance	Elevation
Aérodrome de Grenoble Le Versoud	Aerodrome	18 km S	220 m
Centre Hospitalier Heliport	Heliport	21 km N	319 m
Aérodrome de Chambéry Challes-les-Eaux	Aerodrome	22 km N	297 m
Hôpital Nord Heliport	Heliport	23 km SW	218 m

Description

This archaeological curiosity, well known to locals, hunters and chamois, was only revealed "to the world" in 2005 by Pascal Sombardier in his book "Chartreuse Inédite". This superb book is also normally available, along with the poster of the cover photo, in our shop. This pierced tower is well hidden since it is almost invisible from nowhere, nestled in the middle of a circus of cliffs, oriental to the Aulp du Seuil. Unfortunately (or fortunately?), it is located on private land, and dangerous to access (unstable turns, climbing passages, slippery grassy slopes, exposed terrain, essential equipment). No path or official topo is therefore accessible.

Scan to open the up-to-date spot page: weather, map and restrictions.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
