LES ARCADES du GUÉ de la ROCHE PLAYED on ERDRE

Heritage · Loire-Atlantique

GPS coordinates	47.49141, -1.46760
Elevation	29 m
Maximum height	120 m max
Access	On foot < 1,000 m
Nearest aerodrome	Ancenis Airfield (LFFI) 24 km SE · same altitude as the spot
Spot reference	299384

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Description

Built between 1833 and 1836, the supply channel (also called the Petit Canal) connects the large Vioreau water reservoir and its dam to the Bout de Bois watershed, near the Pas d'Héric lock. With a length of 21.3 km, the gully is a real small channel about 1 meter deep. During its construction, in order to ensure a constant slope of 14 cm per km, while crossing the various valleys between Vioreau and the canal, it was necessary to build 4 aqueducts (commonly called "Arcades") as well as a 600 m long tunnel to avoid following the meanders of the contour lines.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
