FLIGHT CARD

Generated on 21 November 2026

Keukenhof, The World's Biggest Flower Garden

Unusual · Netherlands

GPS coordinates	52.27002, 4.54639
Elevation	9 m
Maximum height	120 m max
Access	Direct access by car
Nearest aerodrome	Langeveld Glider Field 3.8 km NW · spot 6 m higher
Spot reference	299648

Spot location and restrictions (Drone-Spot map image)

Amsterdam Airport Schiphol	Major airport	15 km E	-3 m

Description

The Keukenhof in the Netherlands is perhaps the most beautiful spring garden in the world. More than seven million tulips, daffodils and hyacinths fill over 32 hectares with color and fragrance. Each year the park attracts more than 800,000 tourists from all over the world. This unique aerial video shows some of the highlights from the park, including the 2015 flower painting of Vincent van Gogh, a typical Dutch drawbridge, the central lake&fountain, and numerous flower beds; all seen from a drone's perspective. The video was shot with permission from the park administration. Equipment used: DJI Phantom 2 with Zenmuse H4-3D gimbal en 4K camera.

Scan to open the up-to-date spot page: weather, map and restrictions.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

This country applies the European drone rules (open category); it may add its own zones and conditions.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
