Mare aux Évées (Fontainebleau - 77)

Water · Seine-et-Marne

GPS coordinates	48.47615, 2.65925
Elevation	82 m
Maximum height	120 m max
Access	On foot < 1,000 m
Nearest aerodrome	Melun-Villaroche Air Base (LFPM) 14 km N · spot 10 m lower
Spot reference	299840

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Moret Episy Airfield	Aerodrome	18 km SE	77 m
Centre Hospitalier Heliport	Heliport	19 km NW	78 m
Centre Hospitalier Sud Francilien Heliport	Heliport	22 km NW	78 m

Description

Small pond in the heart of the forest of Fontainebleau about 500 m on foot from the crossroads of Épine Foreuses where parking is possible. Flying in undergrowth par excellence so be careful with the branches. It is best to disable the RTH and fly in Tripod mode with all avoidance sensors active if available. Almost only flying over the pond gives free access to the sky! Wild ducks, water hens, various trees etc... The use of a polarizing filter is a plus for water shots. Beware of the many walkers in this area.

Scan to open the up-to-date spot page: weather, map and restrictions.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
