FLIGHT CARD

Generated on 21 November 2026

Abbey - Mont-Saint-Eloi

Heritage · Pas-de-Calais

GPS coordinates	50.34985, 2.70126
Elevation	97 m
Maximum height	120 m max
Access	Direct access by car
Nearest aerodrome	Arras Roclincourt Airfield (LFQD) 7.8 km E · spot 6 m lower
Spot reference	299847

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:36	08:13	16:57	17:34	8 h 44	08:13–09:06 · 16:04–16:57
Sun 22 Nov	07:38	08:14	16:56	17:33	8 h 41	08:14–09:08 · 16:03–16:56
Mon 23 Nov	07:39	08:16	16:55	17:32	8 h 39	08:16–09:10 · 16:01–16:55

Lens Benifontaine Airfield	Aerodrome	15 km NE	51 m
Vitry en Artois Airfield	Aerodrome	21 km E	53 m

Description

The Abbey of Mount St. Eloi, founded by St. Vindicio, which was destroyed when it was sold as a national property in 1793, was home to a community of Canons Regular of the Rule of St. Augustine, who carried out an important literary activity. The towers still present on the site were the facade of the abbey church rebuilt in the 18th century and then demolished in the early 19th century and during the First World War. I advise you to take the D49 before arriving in the village, there is a small road (without name) on your right and from there you can take off without any problem. The abbey is located in front of you, at the top of the hill.

Scan to open the up-to-date spot page: weather, map and restrictions.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
