Pranu Muttedu, the Stonehenge of Sardinia

Heritage · Italy

GPS coordinates	39.56789, 9.27123
Elevation	536 m
Maximum height	120 m max
Access	On foot < 1,000 m
Nearest aerodrome	Base elicotteri corpo forestale di Villasalto 14 km SE · spot 40 m lower
Spot reference	299907

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	06:45	07:14	17:04	17:33	9 h 50	07:14–07:54 · 16:23–17:04

Aviosuperficie Aliquirra	Aerodrome	20 km NE	574 m

Description

Second video of our channel shot in the archaeological area called Pranu Mutteddu, one of the most suggestive and important funerary areas of prehistoric Sardinia. We are in south-eastern Sardinia, in the territory of the small town of Goni (Ca), in the Gerrei region. In this archaeological area there is the highest concentration of menhirs and megaliths on the island and you can admire several Domus de Janas, the so-called 'fairy houses', artificial caves dug into the rock that were used as burials.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

This country applies the European drone rules (open category); it may add its own zones and conditions.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
