FLIGHT CARD

Generated on 21 November 2026

Louis Vicat Bridge, Dordogne

Water · Lot

GPS coordinates	44.88645, 1.48086
Elevation	87 m
Maximum height	50 m max
Access	On foot < 1,000 m
Nearest aerodrome	Aérodrome de Peyrillac 5.1 km W · spot 187 m lower
Spot reference	300502

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:27	07:59	17:21	17:53	9 h 21	07:59–08:45 · 16:35–17:21
Sun 22 Nov	07:28	08:01	17:20	17:52	9 h 19	08:01–08:46 · 16:34–17:20
Mon 23 Nov	07:30	08:02	17:19	17:51	9 h 17	08:02–08:48 · 16:33–17:19

Nearby aerodromes

Aerodrome	Type	Distance	Elevation
Aérodrome de Peyrillac	Aerodrome	5.1 km W	274 m
Aérodrome de Loupiac	Aerodrome	6.1 km S	273 m
Aérodrome de Lacave le Frau	Aerodrome	9.8 km SE	299 m
Brive-Souillac	Airport	17 km N	310 m

Description

Spotlight to fly over the Dordogne and the bridge linking Souillac to Lanzac (Louis Vicat Bridge) Take-off from the field behind the bank (Lanzac side), direct access by car. The maximum flying height is 50 meters Be careful not to fly over the campsite and the nearby swimming beach, it is however very easy to get around this area by taking off in the area I have indicated and flying directly in the axis of the Dordogne.

Scan to open the up-to-date spot page: weather, map and restrictions.

https://www.drone-spot.tech/en/fiche-spot.aspx?id=300502

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
