FLIGHT CARD

Generated on 21 November 2026

Tucoy Peak - Pyrenees

Mountain · Hautes-Pyrénées

GPS coordinates	42.95064, -0.12669
Elevation	1,664 m
Maximum height	50 m max
Access	On foot > 1,000 m
Nearest aerodrome	Cabaliros Altiport 0.6 km W · spot 89 m lower
Spot reference	301134

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:29	08:00	17:33	18:03	9 h 32	08:00–08:44 · 16:49–17:33
Sun 22 Nov	07:30	08:01	17:32	18:03	9 h 30	08:01–08:45 · 16:48–17:32
Mon 23 Nov	07:32	08:03	17:31	18:02	9 h 28	08:03–08:47 · 16:47–17:31

Nearby aerodromes

Aerodrome	Type	Distance	Elevation
Cabaliros Altiport	Aerodrome	0.6 km W	1,753 m
Arbouix Heliport	Heliport	6.8 km NE	400 m
Vallon des Bergons	Aerodrome	8.9 km NW	1,050 m
Altisurface d'Hautacam	Aerodrome	10 km NE	1,680 m

Description

Located on the heights of Argelès-Gazost, the Pic de Tucoy culminates at 1800m. Quickly accessible, less than an hour's walk from a small forest road. After about 30 minutes of walking, this magnificent landscape is offered to you. A panoramic view of the Pyrenees chain, the Pic du Midi de Bigorre, the Gabizos peaks, the Cabaliros peak and many others. Perfectly oriented to capture the sunset and sunrise, and with a bit of luck, you can also enjoy a magical awakening with a sea of clouds at almost 360 degrees.

Scan to open the up-to-date spot page: weather, map and restrictions.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
