Tronçais Forest

Unusual · Allier

GPS coordinates	46.66575, 2.76601
Elevation	227 m
Maximum height	120 m max
Access	On foot < 1,000 m
Nearest aerodrome	Aérodrome de Lurcy-Levis (LFJU) 15 km E · same altitude as the spot
Spot reference	301139

Description

Stretching over nearly 11,000 hectares, the Tronçais forest is one of the most beautiful forest massifs in France. The forest has been carved over and over again, and has finally regained its rights and now boasts specimens that are several hundred years old. This important oak grove also has beeches and hornbeams to force the oaks to seek the light ever higher. The 40-metre barrels thus obtained (after some 250 years!) place the vault of vegetation at the height of the cathedrals. The forest retains a rare atmosphere, an impressive majesty. Crossed by Caesar, rehabilitated under Colbert, once full of Gallic Maquis camps and Gallo-Roman sites, the forest still preserves traces of the passage of man since prehistoric times. It is by taking their time, snooping here and there under the woods, that walkers really discover the forest and appreciate its vestiges, the freshness of a …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
