## Nearby aerodromes

| Aerodrome | Type | Distance | Elevation |
|---|---|---|---|
| Aérodrome d'Albé - Val de Villé | Aerodrome | 14 km SW | 380 m |
| Club ULM de Kogenheim | Aerodrome | 18 km SE | 161 m |
| Strasbourg Airport | Airport | 18 km NE | 154 m |
| Graffenstaden Centre Hospitalier Heliport | Heliport | 25 km E | 157 m |

## Description

Rathsamhausen Castle is a historical monument located in Ottrott, in the French department of Bas-Rhin. It is very close to a second castle, the Lutzelbourg castle. The construction of the castle was ordered by Duke Otton of Burgundy to control the region. The Lutzenburgs are also present, and reinforce a first version of the castle shortly after the construction of the Rathsamhausen. Enemy families stand 50 metres apart, a crossbow distance. The spot is easy to access (30 mn walk from OTTROTT). Access to the castle is forbidden due to the danger of falling rocks. Only the drone can explore. Take-off zone 20 meters wide, 50 meters from the first castle.

**Scan to open the up-to-date spot page: weather, map and restrictions.**

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

# Preparing the flight

## Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

## Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

*Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.*
