The Batère Tower

Heritage · Pyrénées-Orientales

GPS coordinates	42.51000, 2.57286
Elevation	1,474 m
Maximum height	120 m max
Access	On foot < 1,000 m
Nearest aerodrome	Torre-Blanc Llauro 14 km E · spot 1,013 m higher
Spot reference	301586

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Mon 23 Nov	07:20	07:51	17:22	17:52	9 h 31	07:51–08:34 · 16:38–17:22
Tue 24 Nov	07:21	07:52	17:21	17:52	9 h 29	07:52–08:35 · 16:37–17:21
Wed 25 Nov	07:22	07:53	17:20	17:51	9 h 27	07:53–08:37 · 16:37–17:20

Aerodrome	Type	Distance	Elevation
Torre-Blanc Llauro	Aerodrome	14 km E	460 m
Base ULM Corneilla de la Rivière	Aerodrome	24 km NE	70 m

Description

The Batère tower stands at the top of a ridge descending from the Canigou, 1,439 m above the plain, straddling the communes of Saint Marsal and Corsavy, in the Haut Vallespir. The tower of Batère offers a breathtaking view of Perpignan, the Aspres, the plain and the sea on one side, and the whole of Vallespir on the other. One way to get there is by a dirt road, the ancient Roman road. The Tour de Batère is part of the system known as the Roussillon signal towers. It functioned as an instrument of military communication throughout the Middle Ages, from the 10th to the 15th century. http://www.guideduvallespir.com/accueil/vallespir-tourisme/sites-historiques/tour-de-batere/

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
