Statue of Vercingetorix - Alise Sainte Reine

Heritage · Côte-d'Or

GPS coordinates	47.54018, 4.49598
Elevation	388 m
Maximum height	120 m max
Access	On foot < 1,000 m
Nearest aerodrome	Cessey Baigneux les Juifs Airfield (LFSY) 12 km NE · spot 30 m higher
Spot reference	301691

Spot location and restrictions (Drone-Spot map image)

Description

Alise lies at the foot of Mount Auxois. Successive archaeological excavations have identified a Gallic oppidum recognized by the scientific community as the archaeological site of the siege of Alesia. The village of Alise was built on the southern slope of the hill of the plateau where the Gallo-Roman settlement of Alesia was located. Of late-antique origin 5th century, it succeeded the ancient settlement of the plateau. The abbey of Flavigny was only 5 km 37.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
