Submarine UC-61

Heritage · Pas-de-Calais

GPS coordinates	50.89146, 1.66321
Elevation	2 m
Maximum height	120 m max
Access	On foot < 1,000 m
Nearest aerodrome	Saint-Inglevert Aerodrome (LFIS) 5.2 km E · spot 115 m lower
Spot reference	302039

Boulogne Sur Mer Centre Hospitalier Heliport	Heliport	19 km S	85 m
Calais-Dunkerque Airport	Airport	22 km E	4 m

Description

The Unterseeboot UC-61 or SM UC-61 is a German submarine (U-Boot) type UC II used by the Kaiserliche Marine during the First World War. The submarine was ordered on 12 January 1916 in Bremen (AG Weser), its keel was laid on 3 April 1916, it was launched on 11 November 1916 and put into service on 13 December 1916, under the command of Kapitänleutnant Georg Gerth. She was abandoned by her crew near Wissant after an accidental grounding in July 1917 and was damaged by explosives by the crew. This submarine will sink 12 ships and damage several others in its short career. From 1932 until January 2019, the wreck was completely silted up and forgotten by the collective memory. Since this year, it is again visible at the following coordinates: 50° 54′ N, 1° 40′ E. Be careful, it's a remnant of war, even if its size is small, there may be danger.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
