Piste privée de La Cornélie	Aerodrome	24 km SE	61 m

Description

FINALLY!!! After several months of pause (including 2 months due to the confinement) the Mi drone went to stretch the propellers. Today a short flight over the wind farm of Bouin (85), located on the seafront facing the bay of Bourgneuf - en Retz (44). The weather was nice with a few clouds, the wind was very present, ideal to dust off this good old Mi drone 4K. The wind farm consists of 8 wind turbines. Moved by three 40m long blades, the wind turbines with a power of 2.4 and 2.5 MW and whose total power reaches 19.5 MW produce about 40 million KWh, which corresponds to the electricity consumption of 20,000 households, excluding heating. The presence of these wind turbines in the municipality of Bouin is not anachronistic since, in the past, the municipality had up to 14 mills on its territory. You can reach them by road by following the direction of Beauvoir-sur-Mer and then the port ...

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
