Pont du Châtelet (From 30 to 1min 30)

Heritage · Alpes-de-Haute-Provence

GPS coordinates	44.53629, 6.78578
Elevation	1,588 m
Maximum height	120 m max
Access	On foot < 1,000 m
Nearest aerodrome	Vars Helistrip 6.8 km W · spot 575 m lower
Spot reference	303801

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:05	07:37	17:00	17:32	9 h 23	07:37–08:22 · 16:15–17:00
Sun 22 Nov	07:06	07:38	17:00	17:32	9 h 21	07:38–08:24 · 16:14–17:00
Mon 23 Nov	07:08	07:40	16:59	17:31	9 h 19	07:40–08:25 · 16:13–16:59

Barcelonnette - Saint-Pons Airfield	Aerodrome	22 km SW	1,132 m
Mont-Dauphin - St-Crépin Airfield	Aerodrome	24 km NW	903 m

Description

The Châtelet bridge is part of the only vehicular access in the hamlet of Fouillouse. It has a single lane width of 3m, located in the commune of Saint-Paul-sur-Ubaye. In spite of its unique stone arch, it seems as if it is standing at the top of a narrow gorge of 27 meters, very deep, as it overhangs the river Ubaye by 108 meters. The mountainous setting, the ochre-grey tones of the rock, the narrowness, as well as the immediate link with a small single-track rock tunnel, make the site really striking. The only possibility of pedestrian and mule access ended in 1888 with the opening of this road for the very first cambered road.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
