Saint-Guilhem-le-Désert and the Devil's Bridge

Heritage · Hérault

GPS coordinates	43.71411, 3.55306
Elevation	48 m
Maximum height	120 m max
Access	On foot < 1,000 m
Nearest aerodrome	Aérodrome de Saint-Martin-de-Londres (LFNL) 21 km NE · spot 134 m lower
Spot reference	303895

Spot location and restrictions (Drone-Spot map image)

Description

Saint-Guilhem-le-Désert is a spiritual stopover on the Way to Santiago de Compostela. It is a small medieval town, part of the Most Beautiful Villages in France, which offers you a unique opportunity to take a break... At the entrance to the Hérault gorges, at the place known as the "black abyss", the old Romanesque bridge, clinging to the steep banks, spans the river at its narrowest point. Considered to be one of the oldest medieval bridges in France, it has been classified as a World Heritage Site by UNESCO as part of France's Way of St. James in Santiago de Compostela. It was built between 1028 and 1031, by the two nearby abbeys of Aniane and Gellone, who jealously controlled both banks of the river. It is 50 m long and has two main round arches and two secondary openings, the gills, to facilitate the flow of water in times of flooding.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
