Yutz - Yutz Lorraine Aeromodelling Club (CAMYL) runway

Unusual · Moselle

GPS coordinates	49.38306, 6.20542
Elevation	153 m
Maximum height	120 m max
Access	Direct access by car
Nearest aerodrome	Centre Hospitalier Emile Mayrisch Heliport 21 km NW · spot 143 m lower
Spot reference	304083

Spot location and restrictions (Drone-Spot map image)

Villerupt Aerodrome	Aerodrome	23 km W	396 m

Description

After taking off from the tarred runway of CAMYL located in one of the loops of the Moselle downstream of Yutz, in flight you will have a superb view of the Moselle valley free of any interference or obstacles. Within a radius of a few kilometres, you will find Thionville and Yutz, the gravel and sand pits in the process of exploitation and renaturation, the nuclear power station of Cattenom, and of course the Moselle with its river and nautical activities. With a bit of luck you can even fly in the company of the storks that have established a colony on the other bank in Garche, or the cormorants that fish in the Moselle. No flight altitude limitation to be respected, except the traditional 150 m. Be careful to respect no-fly zones over inhabited areas, to stay at a good distance from the nuclear power plant and not to harm biodiversity by keeping respectable distances with these …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
