Koenigsmacker - Dam and lock

Water · Moselle

GPS coordinates	49.40684, 6.26375
Elevation	149 m
Maximum height	120 m max
Access	Direct access by car
Nearest aerodrome	Centre Hospitalier Emile Mayrisch Heliport 23 km NW · spot 147 m lower
Spot reference	304089

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:19	07:55	16:47	17:22	8 h 51	07:55–08:47 · 15:55–16:47
Sun 22 Nov	07:21	07:57	16:46	17:21	8 h 49	07:57–08:49 · 15:54–16:46

Clinique Ste-Thérèse heliport	Heliport	24 km NW	305 m
Luxembourg-Findel International Airport	Major airport	24 km N	376 m

Description

From this spot you will have a clear flying area for several kilometres along the Moselle valley. The Koenigsmacker lock and dam are a few hundred meters away. You can walk along the meandering river and discover its mosaic of ponds, old sand and gravel pits. Take care to fly high enough to avoid disturbing fishermen and birds, some species of which are protected. As unobtrusively as possible, here you can fly over wild geese, cormorants, swans and many other wetland species. Altitude limited to 150 m. No interferences noticed on flying days and sufficiently clear sites in the North, South and East to have good transmission and free flying areas. Be careful to avoid flying over Cattenom's dwellings and the lock officers' service quarters. Also be aware of a no-fly zone nearby, as further west is the Cattenom nuclear power plant. Have a good flight.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
