Joux Plane Collar

Mountain · Haute-Savoie

GPS coordinates	46.13292, 6.71398
Elevation	1,714 m
Maximum height	120 m max
Access	On foot > 1,000 m
Nearest aerodrome	Altisurface de Morzine-Avoriaz 7.4 km NE · spot 26 m lower
Spot reference	304274

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:09	07:42	16:56	17:29	9 h 13	07:42–08:29 · 16:09–16:56
Sun 22 Nov	07:11	07:44	16:55	17:28	9 h 11	07:44–08:31 · 16:08–16:55
Mon 23 Nov	07:12	07:45	16:54	17:27	9 h 09	07:45–08:32 · 16:07–16:54

Nearby aerodromes

Altisurface de Morzine-Avoriaz	Aerodrome	7.4 km NE	1,740 m
Remontées Mécaniques Heliport	Heliport	10 km W	1,504 m
Flaine-Hiver Heliport	Heliport	14 km S	1,571 m
Flaine-Ete Heliport	Heliport	14 km S	1,615 m

Description

The Col de Joux Plane is located above the lake of the same name. You have to walk around the right side of the lake, and follow the road that leads to the pass. On the other side, there is a view of Morzine and the Pointe de Nyon. When you reach the pass, you have to walk right on a shoulder which offers good flight points: you can either fly on the lake side or on the Morzine side. The video shows a flight from the Morzine side to the pass, and then a view of the Lac de Joux Plane from the Samoëns side. (Sorry for the jerks, this is one of my first flights...)

Scan to open the up-to-date spot page: weather, map and restrictions.

https://www.drone-spot.tech/en/fiche-spot.aspx?id=304274

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
