FLIGHT CARD

Generated on 21 November 2026

Rochecolombe

Heritage · Ardèche

GPS coordinates	44.51831, 4.44047
Elevation	240 m
Maximum height	60 m max
Access	On foot < 1,000 m
Nearest aerodrome	Aubenas-Ardèche Méridional Airport (LFHO) 6.1 km NW · spot 41 m lower
Spot reference	304482

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Centre Hospitalier Heliport	Heliport	11 km N	223 m
Ruoms Airport	Aerodrome	12 km SW	110 m
Aérodrome de Montélimar - Ancône	Aerodrome	25 km E	73 m

Description

The old village of Rochecolombe. The Saint Bartholomew's chapel. The waterfall (dry in summer) You can easily reach the car park by car, then you have to take the small path that leads to the waterfall. One can also reach the top of the old village by taking the small road on the right before arriving at the carpark, it allows to take off at the height of the old chapel! All the area east of the old village is authorized, however you should not fly over the village and its western area.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
