FLIGHT CARD

Generated on 21 November 2026

Saint Gilles Croix de Vie

Water · Vendée

GPS coordinates	46.69514, -1.94409
Maximum height	120 m max
Access	On foot > 1,000 m
Nearest aerodrome	Challans Heliport 20 km NE
Spot reference	304517

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:45	08:19	17:29	18:02	9 h 09	08:19–09:06 · 16:41–17:29
Sun 22 Nov	07:47	08:20	17:28	18:01	9 h 07	08:20–09:08 · 16:40–17:28
Mon 23 Nov	07:48	08:21	17:27	18:01	9 h 05	08:21–09:10 · 16:39–17:27

Nearby aerodromes

Aerodrome	Type	Distance	Elevation
Challans Heliport	Heliport	20 km NE	40 m
Piste privée de La Cornélie	Aerodrome	21 km NE	61 m
Beauvoir-Sur-Mer Fromentine Heliport	Heliport	24 km NW	3 m
Beauvoir Fromentine Airport	Aerodrome	24 km NW	3 m

Description

A great spot in the Vendée which allows you to take pictures as if you were in an urban area, but with a lot of constraints (strong wind, aggressive gull, a lot of walkers in season), you have to be very vigilant and respect the safety rules. I recommend you not to go too low at the port level and to be ready to put the gas to escape the gulls, especially if you have babies around.

Scan to open the up-to-date spot page: weather, map and restrictions.

https://www.drone-spot.tech/en/fiche-spot.aspx?id=304517

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
