Filitosa - Prehistoric Site

Heritage · Corse

GPS coordinates	41.74806, 8.87005
Elevation	45 m
Maximum height	60 m max
Access	On foot < 1,000 m
Nearest aerodrome	Propriano Airport (LFKO) 9.9 km S · spot 41 m higher
Spot reference	304628

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	06:51	07:21	17:00	17:30	9 h 38	07:21–08:03 · 16:17–17:00
Sun 22 Nov	06:52	07:22	16:59	17:29	9 h 37	07:22–08:05 · 16:17–16:59
Mon 23 Nov	06:53	07:23	16:59	17:29	9 h 35	07:23–08:06 · 16:16–16:59

Aerodrome	Type	Distance	Elevation
Propriano Airport	Aerodrome	9.9 km S	4 m
Ajaccio-Napoléon Bonaparte Airport	Airport	20 km N	5 m

Description

The prehistoric site occupies a spur that has been blocked by an enclosure of large granite blocks. The site, consisting of a fortified and cult area and a nearby quarry, has produced some of the most beautiful ceramics, stone millstones and menhir statues in Corsica. The vestiges of several civilizations are superimposed and mixed there from the Neolithic period, around 3000 BC. Megalithic remains from 3,000 to 2,000 years before our era are recognizable in the form of menhirs and the "Torréen" habitat. The take-off site is located in one of the meadows near the valley between the megalithic quarry and the main archaeological site. It is possible to fly while avoiding the overflight of tourists and the village while staying below 100 m of altitude. No interference found on the day of the flight. Have a good flight!

Scan to open the up-to-date spot page: weather, map and restrictions.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
