Douhet Harbor - Saint Georges d'Oléron

Water · Charente-Maritime

GPS coordinates	46.00193, -1.31944
Maximum height	60 m max
Access	On foot < 1,000 m
Nearest aerodrome	St Pierre d'Oléron Airfield (LFDP) 4.8 km S
Spot reference	305008

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

La Rochelle-Île de Ré Airport	Airport	22 km NE	23 m
Centre Hospitalier Heliport	Heliport	22 km NE	15 m

Description

Located between the villages of Foulerot and Les Boulassiers, this small harbor, rehabilitated in the late 1980s, is an almost obligatory stop on your bike rides. Whether you come from La Brée across fields and marshes, from Saint-Georges along the channel, or from Boyardville through the state forest, you will have had a great ride in any case. The Douhet channel is the boundary between the communes of St-Georges d'Oléron and La Brée. It has a capacity of about 350 boats. It is equipped with a modern harbor office for the needs of recreational boaters. During the summer season, it is a lively place on Oléron.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
