Entrance to Boyardville Harbor

Water · Charente-Maritime

GPS coordinates	45.97084, -1.23027
Maximum height	120 m max
Access	On foot < 1,000 m
Nearest aerodrome	St Pierre d'Oléron Airfield (LFDP) 6.8 km W
Spot reference	305011

Description

The name Boyardville comes from the period when Fort Boyard was being built. The construction site facilities were set up there and the fort's workers lived there. Boyardville beach is the best beach for seeing Fort Boyard, and Boyardville harbor is particularly well placed for boat trips around Fort Boyard. The Perrotine channel opens onto the Coureau d'Oléron, the arm of the sea between the island of Oléron and the mainland. It is busy with the comings and goings of oyster-farming boats, fishing boats and sightseeing boats... the show is non-stop. I recommend taking off from the end of the pier and staying north of it, because to the south there is a strict nature reserve where access is prohibited...

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
