FLIGHT CARD

Generated on 21 November 2026

Pic Carlit

Mountain · Pyrénées-Orientales

GPS coordinates	42.57078, 1.93351
Elevation	2,835 m
Maximum height	50 m max
Access	On foot < 1,000 m
Nearest aerodrome	Mont Llaret Roc d'Aude Airfield 7.6 km E · spot 485 m higher
Spot reference	305024

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:20	07:51	17:25	17:56	9 h 34	07:51–08:34 · 16:42–17:25
Sun 22 Nov	07:21	07:52	17:25	17:55	9 h 32	07:52–08:35 · 16:41–17:25

Aerodrome	Type	Distance	Elevation
Mont Llaret Roc d'Aude Airfield	Aerodrome	7.6 km E	2,350 m
Altisurface de Coste Del Palm	Aerodrome	7.6 km NE	2,350 m
Mont Llaret Pic d'Aude Airfield	Aerodrome	8.6 km E	2,325 m
Altisurface du Clos de Legua	Aerodrome	13 km NE	2,400 m

Description

The Pic Carlit is a metamorphic summit of the French Pyrenees located in the Carlit massif. It is the highest point of the Pyrénées-Orientales department, at an altitude of 2,921 meters. Its name comes from the massif in which it stands.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
