Parata Tower

Heritage · Corse

GPS coordinates	41.89541, 8.60847
Elevation	54 m
Maximum height	50 m max
Access	On foot > 1,000 m
Nearest aerodrome	Ajaccio-Napoléon Bonaparte Airport (LFKJ) 16 km E · spot 48 m higher
Spot reference	305107

Spot location and restrictions (Drone-Spot map image)

Description

Just a few minutes from downtown Ajaccio, enjoy the exceptional site of the Sanguinaires Islands "I Sanguinari", classified as a "Grand Site" by the Ministry of the Environment. This area has been developed so you can discover the peninsula and its Genoese tower safely and with respect for the environment. Located at the entrance of the Gulf of Ajaccio, the site offers an exceptional panorama and marine atmospheres in the heart of the coastal maquis. >From the parking lot to the end of the road: 0h 15 02:55 The Parata Tower in the video

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
