Description

Warning: maximum height 50 meters A fairytale castle... Bourscheid Castle is a Luxembourg fortress located in Bourscheid, in the north of the country. The castle is built a few hundred meters east of the village of Bourscheid (Canton of Diekirch) on a rocky promontory that overlooks the Sûre by 150 meters. Triangular in shape, it is accessible from only one side, the northwest. History Around the year 1000, a wooden fort was transformed into a stone fortress (excavations have uncovered Roman, Merovingian, Carolingian and Ottonian structures). Of this first stone construction, only the keep and the curtain wall surrounding the upper castle remain. The reinforcement with 8 towers and baileys of the outer wall was completed in 1384. That same year, the Stolzembourg house was built to improve the lord's comfort. This residence was later raised to reach 10 meters (4 floors),. Winter in ...

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

This country applies the European drone rules (open category); it may add its own zones and conditions.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
