Cirque de Saint-Même

Mountain · Isère

GPS coordinates	45.39191, 5.89170
Elevation	1,036 m
Maximum height	120 m max
Access	On foot < 1,000 m
Nearest aerodrome	Centre Hospitalier Heliport 19 km N · spot 717 m higher
Spot reference	305197

Spot location and restrictions (Drone-Spot map image)

Aérodrome de Grenoble Le Versoud	Aerodrome	19 km S	220 m
Aérodrome de Chambéry Challes-les-Eaux	Aerodrome	20 km N	297 m
St Jean D'avelanne Airfield	Aerodrome	22 km NW	294 m

Description

The Cirque de Saint-Même, located at an altitude of 900 m, offers walkers landscapes of rare beauty. It is part of the Hauts de Chartreuse national nature reserve. The waters come from underground springs of the Guiers Vif, a historic border between the Dauphiné and the Kingdom of Savoy, and currently the boundary between the two departments of Savoie and Isère. A marked 1.5-hour hike, between forest and torrent, will give you an incredible view of the waterfalls.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
