Arsenal-Premar Heliport	Heliport	13 km W	8 m

Description

Cap Lévi is a headland located on the English Channel, in the commune of Fermanville, near Cherbourg-en-Cotentin, in Normandy. The presence of shoals and strong currents made it necessary to build a lighthouse in the 19th century to protect ships heading toward the port of Cherbourg. Destroyed in 1944, the old lighthouse was replaced by a 36-meter-tall tower in 1947. Fermanville is a French commune located in the Manche department in the Normandy region, with a population of 1,281. Located between Cherbourg-en-Cotentin and Barfleur, Fermanville developed as small hamlets on either side of Cap Lévi, the eastern end of the Cherbourg roadstead, and of the valley of the small river Poult. It marks the entrance to the Val de Saire. The village economy relies on farming, fishing (mackerel, sea bass, lobster and oysters), and tourism.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
