Col d'Ugeon

Mountain · Switzerland

GPS coordinates	46.34948, 6.78243
Elevation	1,983 m
Maximum height	100 m max
Access	On foot > 1,000 m
Nearest aerodrome	Base ULM Thollon les Mémises 7.3 km NW · spot 1,070 m higher
Spot reference	306710

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Altisurface de Morzine-Avoriaz	Aerodrome	18 km S	1,740 m

Description

Col d'Ugeon 2017 m Accessible on foot, with snowshoes or on skis from Le Flon (Valais), Bise in summer and Novel in summer on the French side Isolated and wild, the huge rolling plateau that gives access to the Col d'Ugeon is a pure marvel of Alpine nature. The area flown over is on the Swiss side, not far from the border between Switzerland (Valais) and France (Haute-Savoie). Be careful: it adjoins a protected zone on the French side, a biotope protection order, on the Bise alpine pastures.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

This country applies the European drone rules (open category); it may add its own zones and conditions.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
