Description

In the series on discovering our heritage, the Château du Clos de Vougeot. The Château du Clos de Vougeot, or Château du Clos Vougeot, is a castle dating from the 12th and 16th centuries, in Cistercian and Renaissance style, in the Burgundy vineyards, in the middle of the prestigious Clos de Vougeot in Vougeot, on the Route des Grands Crus linking Dijon and Beaune to Vougeot (Côte-d'Or, Bourgogne-Franche-Comté). The château has been listed as a historic monument since 1949 and is open to visitors for its wine museum. Classified as a Site remarquable du goût, it is a major Burgundy venue for events and for promoting traditional Burgundian gastronomy and Burgundy wines through the brotherhood of the Chevaliers du Tastevin. In 2006, the Climats of Burgundy were added to the UNESCO World Heritage list. In the 12th century, the monks of the important 11th-century abbey of Cîteaux (the …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
