Description

Landemer is a coastal village in the Manche department, located in the communes of Urville-Nacqueville and Gréville-Hague. Situated in the Hubiland valley, it serves as the eastern gateway to the Hague, at the western exit of the Cherbourg urban area. Not to be confused with the Anse de Landemer in the Val de Saire. With its 80 km of cliffs, dunes and beaches, Landemer has become the main starting point for hikes in the Hague! It is also one of the stages of the famous GR 223, also called the "Customs Officers' Path" or "Coastal Path", a 446 km route linking Carentan to Mont-Saint-Michel. Landemer has attracted artists in the footsteps of Jean-François Millet since the 1880s, as the Conty guide attests in 1885. The village can be reached by car from the place de la Fontaine in Cherbourg. Several hotels welcomed tourists during the interwar period: the Hôtel Voisin, the Hôtel des …

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
