Aerodrome	Type	Distance	Elevation
Cherbourg-Maupertus Airport	Airport	9.0 km SW	140 m
Centre Hospitalier Heliport	Heliport	18 km SW	19 m
Arsenal-Premar Heliport	Heliport	20 km W	8 m

Description

Famous for its shipwrecks, the Pointe du Rocher Tabot is also called the Pointe du Rocher au Pique. The Manche department is little known to naturalists, yet it is home to many bird-watching sites of great value. Located in the Val de Saire, the Vrasville pond forms, together with the Réthoville marsh, a "hydrological entrance", both fed by the Varouville stream. The Vrasville pond has a "drainage structure to the sea" through which seawater can enter the marsh at high tide. The Réthoville pond, on the other hand, has no direct outlet to the sea. It therefore flows into the Vrasville pond. These wetlands are very attractive to birds. During migratory stopovers you can see waders, ducks, egrets, purple herons, marsh harriers, bearded reedlings... These species are not there by chance; their presence is closely linked to the water level, so it is desirable to be able to manage water ...

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
