FLIGHT CARD

Generated on 21 November 2026

Château de Saissac

Heritage · Aude

GPS coordinates	43.35669, 2.16795
Elevation	428 m
Maximum height	120 m max
Access	On foot < 1,000 m
Nearest aerodrome	Aérodrome de la Montagne Noire (LFMG) 15 km W · spot 20 m lower
Spot reference	307224

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:21	07:52	17:22	17:53	9 h 30	07:52–08:36 · 16:38–17:22
Sun 22 Nov	07:22	07:53	17:21	17:53	9 h 28	07:53–08:38 · 16:37–17:21
Mon 23 Nov	07:23	07:55	17:21	17:52	9 h 26	07:55–08:39 · 16:37–17:21

Aerodrome	Type	Distance	Elevation
Aérodrome de la Montagne Noire	Aerodrome	15 km W	448 m
Carcassonne Airport	Airport	19 km SE	132 m
Revel Montgey Airfield	Aerodrome	21 km NW	196 m
Aérodrome de Castelnaudary-Villeneuve	Aerodrome	21 km W	168 m

Description

Beautiful castle with a paid entrance, though not very expensive. You can park right in front or higher up in the village. Be careful: most of the castle is in a red zone. Only the south towers and the area around the castle are in an authorized zone, so you have to settle for filming it from a few meters away or staying near the south towers. The person at the reception desk told me at the time that the managers don't mind. Some drone pilots even prefer to launch the drone from a neighboring field, but the owner doesn't appreciate it.

Scan to open the up-to-date spot page: weather, map and restrictions.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
