FLIGHT CARD

Generated on 21 November 2026

Montbouy Theater

Heritage · Loiret

GPS coordinates	47.87300, 2.81958
Elevation	115 m
Maximum height	120 m max
Access	On foot < 1,000 m
Nearest aerodrome	Montargis Vimory Airport (LFEM) 14 km NW · spot 21 m higher
Spot reference	307356

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour

Base ULM de Perreux	Aerodrome	24 km E	186 m

Description

This amphitheater was part of the ancient town of Montbouy. It is built with small regular stonework with iron joints, unlike the large stonework used for the best-known amphitheaters such as the Colosseum or the arenas of Nîmes. It dates from the end of the Roman period (2nd century AD) and could hold up to 4,000 people. It consists of two parts: the cavea and the arena. . The cavea is for the audience. It is unusual because, unlike a classic amphitheater, it does not go all the way around but only covers 1/3. Shows were held in the elliptical arena. . Typically Gallo-Roman, the Montbouy amphitheater shows the hybridization of the Roman theater and amphitheater, of which the most numerous examples are found in secondary towns and rural sanctuaries of Gallia Lugdunensis. . After the end of the Gallo-Roman era, the amphitheater was not forgotten, as it continued to be known as the "Circus ...

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
