The Pointe du Grouin in Ille-et-Vilaine

Water · Ille-et-Vilaine

GPS coordinates	48.71411, -1.84251
Elevation	0 m
Maximum height	120 m max
Access	On foot < 1,000 m
Nearest aerodrome	Centre Hospitalier Heliport 15 km SW · spot 8 m lower
Spot reference	307509

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:50	08:25	17:21	17:56	8 h 56	08:25–09:16 · 16:31–17:21
Sun 22 Nov	07:51	08:26	17:20	17:56	8 h 54	08:26–09:17 · 16:30–17:20

Centre Hospitalier J. Monod Heliport	Heliport	24 km NE	51 m

Description

The Pointe du Grouin is the northernmost point of Cancale and offers a unique view of the southern part of Mont Saint-Michel. Further along from it is the Phare de la Pierre-de-Herpin lighthouse. This site on the Côte d'Émeraude welcomes between 600,000 and one million visitors in Route du Rhum years, when the point is used to mark the start line. This wild, rocky point rises 40 meters above the sea. The panorama stretches from Cap Fréhel to Granville, taking in the bay of Mont Saint-Michel, off the Chausey islands. A trail, the GR 34, lets you explore a cave carved into the cliff at low tide. The île des Landes, opposite, is a bird and plant reserve.

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
